

IVAN MHARC MAGLANGIT

Junior Web Developer

Davao City, Philippines • ivanmharcmaglangit@gmail.com • linkedin.com/in/ivan-mharc-maglangit-86a473205 • github.com/Mharc2000

PROFESSIONAL SUMMARY

Results-driven Junior Web Developer with extensive experience in enterprise ERPNext customization, full-stack web development, and database administration. Proven track record of developing custom Point of Sale (POS) solutions, end-to-end process automations via Python and JavaScript, and high-performance SQL reporting pipelines. Adept at building intuitive frontend interfaces and reliable backend architectures for pharmaceutical and retail business operations.

WORK EXPERIENCE

Software Developer – Amesco Drug Corporation

May 2024 – Present | Philippines

- Point of Sale (POS) Customization:** Spearheaded customization and continuous feature development for enterprise POS systems, aligning operational workflows with pharmaceutical and retail compliance requirements.
- Full-Stack Process Automation:** Engineered end-to-end automations utilizing ERPNext Client Scripts (JavaScript) and Server Scripts (Python), eliminating manual data entry bottlenecks and streamlining multi-branch inventory tracking.
- Audit-Ready Print Formats:** Designed and implemented standardized, pixel-perfect Print Formats across multiple DocTypes using HTML5/CSS3, ensuring compliance with internal audit standards and regulatory requirements.
- Business Intelligence & Reporting:** Architected optimized SQL queries and custom analytics dashboards, delivering real-time executive visibility into sales trends, stock movement, and inventory reconciliation.

Assistant Database & System Administrator – Ana's Breeders Farms Inc

Jul 2023 – Apr 2024 | Davao del Sur, Philippines

- Systems & Server Administration:** Maintained and monitored on-premise Windows/Linux server infrastructure, ensuring continuous uptime, network security, and operational reliability.
- Database Maintenance & Optimization:** Administered relational databases and supported internal .NET applications, conducting regular data backups, query diagnostics, and consistency verifications.
- Security & Access Control:** Managed user permissions, systems policy enforcement, and workstation security to protect critical supply chain and operational data.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C#, SQL, HTML5, CSS3, Bash

Frontend: React, Vue.js, Angular, React Native, Tailwind CSS

Backend & Frameworks: Node.js, Express, FastAPI, Django, PHP, .NET Framework

Databases: MySQL, MariaDB, MongoDB

Platforms & Tools: ERPNext, Linux, Docker, Git, REST APIs, POS Systems

FEATURED PROJECTS

Enterprise ERPNext POS & Automation Suite

Python, ERPNext, JavaScript, MariaDB

- Developed custom Point of Sale modules and background automated scripts for high-volume retail transactions, cutting down manual invoice processing time.

Full-Stack Web Applications & RESTful APIs

React, FastAPI, Node.js, MongoDB/MySQL

- Engineered responsive modern web applications featuring JWT authentication, reactive UI components, and performant REST API endpoints.

EDUCATION

Bachelor of Science in Information Technology

Davao City, Philippines
